6 July 1967

25X1A

MEMORANDUM FOR:

1. I would appreciate your views and guidance in anticipation of a discussion of the proposed functions in the Contract Review Board --- which I assume will occur.

2. The "Proposed Functions of Industrial Contract Security Officers assigned to Directorates exercising Contracting Authority" appear reasonable except that no provision is made to preclude Security Officers from various contracting teams from falling all over each other. Re-inspection seems to be the only item of concern, but Item 15, for example, pertains to establishing security controls for subcontractor employees to whom classified information is given. Thinking about what this could lead to at TI with Security Officers from both the OEL and ORD groups involved, plus TSD, plus COMMO -- just too horrible. This coordination problem falls across many of the functions listed. The problems which will arise unless some preventive plans are worked out will make the re-inspection business fade to insignificance.
